

1. Another student claimed that you could measure the angle of rotation by measuring the arc length of these representations. Do you agree or disagree and why?

Arc Length of $g = 0.769998138033$ Arc Length of $h = 1.9569056808431$ Arc Length of $k = 3.6124264296561$
